DETAILED ACTION

Response to Arguments

1. Applicant's arguments filed August 26, 2010, with respect to the rejection under 35 USC 103(a) as being unpatentable over Sweeney in view of Shusterman have been fully considered and are persuasive. The rejection of claims 1 – 3, 6, 8, and 11 - 13 has been withdrawn.

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1 – 13 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 10 and 14 of U.S. Patent No. 7,477,936. Although the conflicting claims are not identical, they are not patentably distinct from each other because both recite analyzing ECG curvature for indicating Long QT syndrome.

Claim Objections

4. Claims 4 – 7 are objected to because of the following informalities:

Claim 1 recites “a plurality of selected parameters from a number of groups of parameters including symmetry, flatness, duration, **and/or** complexity.” Claim 4 recites a list of symmetry parameters. However, if symmetry is not one of the selected groups of parameters (from claim 1), then claim 4 is indefinite and unclear. It is suggested to first positively recite in claim 4 that at least one of the plurality of selected parameters comprises a symmetry parameter before further describing the symmetry parameter.

Similarly, claim 5 recites a list of flatness parameters; claim 6 recites a list of duration parameters; and claim 7 recites a list of complexity parameters. It is suggested to first positively recite that at least one of the plurality of selected parameters comprises a flatness parameter, a duration parameter, and a complexity parameter, respectively. Appropriate correction is required.

Allowable Subject Matter

5. Claims 1 – 17 would be allowable if the double patenting rejection is overcome and if they are rewritten or amended to overcome the claim objections previously mentioned.

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
